

SAFETY & STANDARDS

STANDARDS

All TeddyOne furniture products are expertly crafted from the highest quality materials for enduring style. All our furniture products have been designed and tested to the highest safety standards, and comply with (subject to legislative revision):

- BSEN:761 for cot beds
- BSEN:12221 for dressers, toppers
- BSEN:4875 for wardrobes
- BSEN:12520 for rocking chair
- BSEN:5852 for flame retardant
- BSEN:1877/7177 for cot bed mattress
- BSEN:71 for low VOC emissions

Each product undergoes rigorous testing by independent laboratories for compliance with British Standards for cot bed safety standards. All of our furniture products meet or exceed these standards.

We use the latest low emissions paint technologies which have been tested and verified to meet stringent chemical emissions standards. The result is reduced chemical exposure for you and your family, improved indoor air quality in your home giving you peace of mind over your family's health.

SAFETY

Position your baby's cot away from direct sunshine, radiators, windows, heaters, lamps, wall decorations, and any furniture that can be used to climb out of the cot.

Put your baby to sleep on his back, with his feet at the bottom of his cot, to reduce the risk of sudden infant death syndrome (SIDS), or cot death.

Choose a good-quality mattress that feels firm and is at least 10cm deep. Make sure that the mattress fits the cot snugly, with no gaps at the sides.

When your baby can sit up, put the mattress in its middle position, remove mobiles and any toys that hang across or dangle from the cot.

When your baby can pull himself up, put the mattress in its lowest position so that he can't climb out.

Don't use a pillow or duvet in your baby's cot. For safe sleeping, your baby needs a surface that is firm and flat, and a duvet may make your baby too hot.

When the cot mattress is at its lowest height and the top rail is below your child's chest, it's time to convert the cot bed to toddler bed with the conversion panels.

Cords on curtains and blinds should be kept short, check that the chains and cords on your blinds and curtains are well out of your child's reach.

Secure wardrobes and dressers to walls with the supplied anti-tip kit to prevent them from falling over on your child. For the same reason, always remember to close drawers.

If you are using have the changing topper, always stay with your baby when you use it. Keep nappy-changing equipment, such as nappy sacks, toiletries, and wipes well out of your baby's reach.

Do not use the chair in its rocking or static setup beyond its intended purpose, the same applies for the ottoman.

All products are designed for domestic use/purpose, we will not be held liable for any improper or negligent use, or non-compliance with the provided assembly, care or safety instructions. If you are unsure how to use your product seek specialist advice or contact Customer Care.
